

PRECISION. PROTECTION. PERFORMANCE.

About Us

Welcome to a Stainless, Seamless world of Innovation

Founded in 2001, **APL** has spent over two decades perfecting the art of **adhesion and surface protection**. What began as a small vision has grown into a trusted name known for creating reliable, high-quality adhesive tapes, films, and packaging solutions that stand the test of time.

Blending innovation with sincerity, we combine modern technology and global practices with the care and precision of Indian craftsmanship. From protecting delicate surfaces to supporting major industries around the world, our work reflects one simple belief — true strength lies in consistency, quality, and trust.

Our Vision

To Lead with Purpose, Not Just Scale

At **APL**, our vision is to become a name that stands for trust, innovation, and care in every market we touch. We aim to build a future where packaging and protection go beyond function — where every product reflects intelligence, responsibility, and craftsmanship.

We see growth not only in numbers, but in relationships, reliability, and reputation — creating a global identity that proudly carries the strength of Indian expertise and the precision of world-class technology.

Our Mission

To Protect, Empower, and Inspire

Our mission is simple — to design **adhesive and protection solutions** that make everyday work safer, smoother, and more efficient. Through continuous innovation, ethical practices, and a people-first approach, we strive to create value that lasts — for our clients, our partners, and our planet.

Every roll we produce, every surface we protect, and every partnership we build reflects our deepest commitment — **to deliver quality that endures and trust that grows stronger with time.**

Product Portfolio

BOPP Adhesive Tape

Built for endurance and everyday excellence, **APL BOPP Adhesive Tape** is the silent backbone of secure packaging. Crafted from high-grade biaxially oriented polypropylene, it offers crystal-clear visibility, strong adhesion, and effortless performance across industries.

Each roll is engineered for smooth application, steady grip, and lasting bond, ensuring packages stay sealed through every stage — from factory floors to global deliveries. Designed for speed, precision, and reliability, it's more than tape — it's packaging made smarter.

Variants Available

- **Medium Tack BOPP Tape** — Perfect for standard packaging and routine applications.
- **High Tack BOPP Tape** — For superior grip and heavy-duty sealing.
- **Printed BOPP Tape** — Custom-printed for branding and security.
- **Coloured BOPP Tape** — For identification, organization, and visual appeal.
- **No-Noise BOPP Tape** — Silent unwinding for clean and quiet packaging lines.
- **Release Coated BOPP Tape** — Ensures consistent unwinding at high machine speeds.
- **Gift & Decorative BOPP Tape** — Adds colour, gloss, and creativity to every package.

Masking Tape

At APL, our **Masking Tapes** are engineered to deliver accuracy where precision meets performance. Designed with advanced Edge-Lock and Stainless Adhesion Technology, they ensure crisp lines, clean removals, and flawless finishes — even in demanding industrial environments.

Developed entirely under the Make in India initiative, our tapes combine tear-resistant crepe paper, waterproof coating, and pressure-sensitive adhesives that leave no residue behind. Whether for automotive masking, furniture coating, or construction finishing, APL's masking solutions are trusted for their consistency, quality, and control.

Variants Available

- **General Purpose Masking Tape** – Ideal for everyday industrial and decorative use.
- **High-Temperature Automotive Masking Tape** – Designed to withstand extreme heat during paint baking cycles.
- **Premium Crepe Paper Masking Tape** – Smooth adhesion and clean removal without residue.
- **Water-Resistant Masking Tape** – Ensures firm grip and protection in humid environments.
- **Customized Width & Adhesion Grades** – Tailored to suit varied industrial applications.

General Purpose Masking Tape

APL's **General Purpose Masking Tape** offers strong adhesion and clean removal on multiple surfaces, making it ideal for painting, decorating, and light industrial use. It is easy to tear by hand yet strong enough to resist curling and edge lifting giving your work the perfect finish every time.

Every roll is tested for consistency, flexibility, and residue-free removal across varied humidity and surface conditions.

Property	Test Data Sheet
Base Material	Saturated Crepe Paper
Adhesive Type	Modified Rubber Adhesive
Paper Thickness	120 ± 10 microns
Adhesive Thickness	33 ± 5 microns
Adhesion Strength	775–800 g/inch (PSTC 101)
Tensile Strength	>8 kg/inch (PSTC 131)
Heat Resistance	Up to 100°C (Convection, 2 hrs)
Elongation Range	8–12%
Shear Strength	>40 min (PSTC 107)

Heat Resistant Masking Tape

Formulated for industrial painting and baking applications, APL Heat Resistant Masking Tape maintains adhesion strength even under high heat and pressure. With superior Edge-Lock and Stainless Adhesion Technology, it prevents paint bleeding, resists shrinkage, and peels off cleanly ensuring smooth, sharp lines every time.

Each batch is rigorously tested for heat stability, peel strength, and performance consistency to meet global automotive and coating standards.

Property	Test Data Sheet
Base Material	Saturated Crepe Paper
Adhesive Type	Modified Rubber Adhesive
Paper Thickness	120 ± 10 microns
Adhesive Thickness	36 ± 5 microns
Adhesion Strength	700–725 g/inch (PSTC 101)
Tensile Strength	>8 kg/inch (PSTC 131)
Heat Resistance	Up to 140°C (Convection, 2 hrs)
Elongation Range	8–12%
Shear Strength	>75 min (PSTC 107)

Kraft Paper Tape

Blending durability with responsibility, **APL Kraft Paper Tape** offers a smart, eco-conscious alternative to plastic packaging tapes. Made from premium kraft paper and high-tack adhesive, it provides secure sealing, effortless handling, and excellent adhesion to corrugated and paperboard surfaces.

Its natural matte finish adds an element of sophistication to packaging while maintaining recyclability and biodegradability. Designed for performance and sustainability, APL Kraft Paper Tape stands as a symbol of strength with conscience.

Variants Available

- **Paper Tapes** – For general packaging and sealing applications.
- **Kraft Paper Tapes** – Standard high-strength sealing solutions.
- **Reinforced Water-Activated Tapes** – Moisture-activated and cross-reinforced for superior bonding.
- **Self-Adhesive Reinforced Tapes** – Easy application with long-lasting adhesion.
- **Printed Reinforced Tapes** – Customizable designs for branding and identification.

Surface Protection LDPE Film

At **APL**, we've redefined surface safety with India's first **Non-Staining Surface Protection LDPE Film** — a breakthrough innovation engineered to preserve the beauty and integrity of every surface it touches. Designed for **steel, aluminum, laminates, glass, marble, ACP panels, and carpets**, our films deliver flawless protection against dust, scratches, and handling damage, all while ensuring effortless removal without stains or residue.

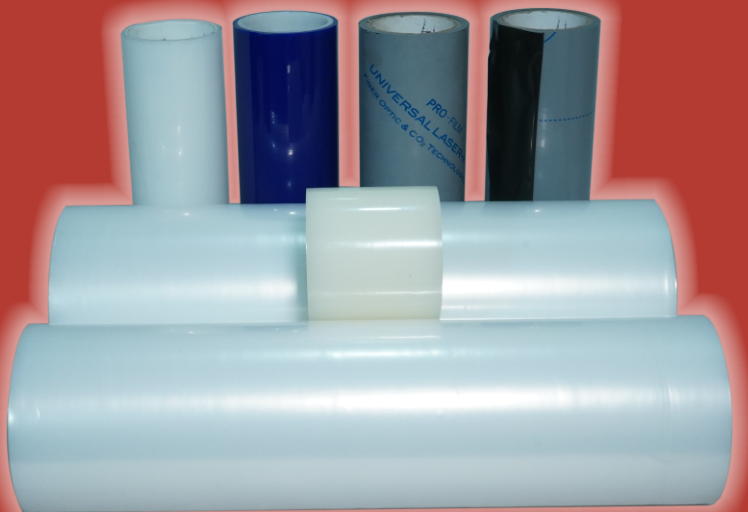

Each film is custom-engineered to surface characteristics, balancing peel strength, temperature tolerance, and adhesive behaviour — a perfect harmony between strength and sensitivity. Whether it's during fabrication, transport, or installation, APL's LDPE films act as a smart, selfless barrier that safeguards quality while simplifying your process.

Variants Available

- **LDPE Plain Film** - Transparent and versatile for general-purpose surface protection.
- **LDPE Surface Protection Tape** - Adhesive-coated version for enhanced grip and precision application.
- **LDPE Black & White Protection Film** - Dual-tone film for light-sensitive surfaces and outdoor use.
- **LDPE Protection Film with Hotmelt Granule Adhesive** - For high-strength adhesion and controlled peel performance.
- **LDPE Shrink Film** - For bundling and wrapping with heat-sealing capability.
- **Floor Guard Film** - Heavy-duty, non-staining floor protection during construction and renovation.

Key Features & Advantages

- Non-Staining Technology
- Weather & UV Resistance
- Easy Application & Removal
- Eco-Responsible Engineering
- Custom Adhesion Levels-
- Tear & Puncture Resistant
- Multiple Colours & Finishes
- Tested & Proven

Double-Sided Tissue Tape

Precision Bonding. Seamless Strength.

Built for performance and versatility, APL Double-Sided Tissue Tape delivers flawless adhesion where reliability and finesse must coexist. Designed to bond, mount, and hold across diverse surfaces, it replaces mechanical fasteners with a cleaner, smarter, and more efficient solution. From signage to trims, laminations to electronics, our tissue tapes combine strong initial tack, uniform coating, and residue-free removal — ensuring every bond is consistent, durable, and precise. Every roll represents APL's commitment to excellence — where every layer is engineered to perform, and every bond is built to last.

Variants Available

- **Hot melt Double-Sided Tissue Tape** — For fast bonding and high initial tack applications.
- **Solvent-Based Double-Sided Tissue Tape** — For long-lasting adhesion on metal, glass, and composite surfaces.
- **Printed Liner Double-Sided DS Tape** — For brand visibility and easy identification.

Key Features

- High Tack Adhesion
- Strong Shear Strength
- Uniform Coating Technology
- Long-Term Durability
- Surface Versatility
- Clean & Residue-Free Removal
- Temperature & Humidity Resistance
- Excellent Die-Cut Compatibility
- Smooth Application & Easy Handling
- Customizable Widths & Thicknesses

Aluminium Foil Tape

Engineered for precision and endurance, **APL Aluminium Foil Tape** combines the toughness of pure aluminum foil with a powerful adhesive layer to provide superior heat reflection, moisture sealing, and insulation performance. It's designed to bond firmly on metal, plastic, and insulation surfaces maintaining integrity even under extreme temperature or humidity. From HVAC and ducting systems to insulation and reflective applications, this tape ensures a secure, airtight seal that resists time, temperature, and tension.

Variants Available

- **With Release Paper** — For precise application, clean handling, and easy liner removal.
- **Without Release Paper** — For faster, continuous application in industrial processes.

OUR PHILOSOPHY

Durability is Not Just a Feature. It is Our Promise. At APL Print Pack, we are not just manufacturers.

We are architects of endurance.

APL's journey has always been research-centric. Long before the industry at large understood the power of R & D in packaging materials, APL was setting up innovation labs and trial centres to experiment with adhesives, polymers, extrusion processes, and coat-weight optimization.

If the machines at APL are made of steel, its spirit is made of people. Mr. Sanjiv Hooda's entrepreneurial journey is not just about patents and performance - it is deeply rooted in service. He often states that "Every square meter of adhesive we produce must stick with purpose." This humanistic approach ensures that APL is not simply manufacturing industrial -grade solutions but is delivering real impact - from safeguarding newly painted surfaces during infrastructure builds to protecting consumer products during long-haul logistics.
